

# Pokedex

To create a new SQL query, you will need to follow these steps:

<p>(a) Click on create</p>	
<p>(b) Click on Query Design</p>	
<p>(c) Click on SQL view to switch to SQL.</p>	
<p>(d) First type in your query: SELECT * From Pokedex</p> <p>Second, click run.</p>	
<p>(e) The number of records is at the bottom, use it to check if you are right.</p>	
<p>(f) Right (not Left)-Click on the name (Query1).  Choose Save</p>	
<p>(g) Put in the right name.  1_entire is the first name.</p>	
<p>(h) Then it will appear at that side. You are now done.</p>	

Create SQL statements for the following things.  
Name them as specified.

	Instructions	Query Name	Number of records returned.
1.	Print the entire table	1_entire	733 records
2.	Print the pokedex number, the name and the type1, type2 information	2_basicInfo	733 records
3.	Print the pokemon with a mass over 30 kg	3_massOver30	339 records
4.	Print the name, attack for the pokemon whose attack >130	4_highAttack	22 records
5.	Print the name, speed and mass of the pokemon whose speed is over 100 and whose mass is under 20.	5_MassSpeed	14 records
6.	Print the name, HP and defense for the pokemon whose defence > 100 and HP is > 100	6_HighDefenceHP	11 records
7.	Print the name and type1, type2 information for all of the "fire" type pokemon.	7_Fire	57 records
8.	Print the name, egggroupI, egggroupII for all of the "dragon" type egg groups.	8_Dragon	45 records

These are the fields in the Pokedex table:

ID	Name	HP	Attack	Defence	SpecialAttac	SpecialDefe	Speed	Total
1	Bulbasaur	45	49	49	65	65	45	318
2	Ivysaur	60	62	63	80	80	60	405
3	Venusaur	80	82	83	100	100	80	525
4	Charmander	39	52	43	60	50	65	309
5	Charmeleon	58	64	58	80	65	80	405

TypeI	TypeII	AbilityI	AbilityII	HiddenAbili	Mass	Color	EggGroupI	EggGroupII
Grass	Poison	Overgrow		Chlorophyll	6.9	Green	Monster	Grass
Grass	Poison	Overgrow		Chlorophyll	13	Green	Monster	Grass
Grass	Poison	Overgrow		Chlorophyll	100	Green	Monster	Grass
Fire		Blaze		Solar Power	8.5	Red	Monster	Dragon
