

Scavenger Hunt

Hidden in the house is a teddy bear. Set up the screen as shown.

Your job is to finish the navigation functions for all the screens using the diagram above.

- atticPick
- bathPick
- diningPick
- laundryPick

This is an example for the living room.

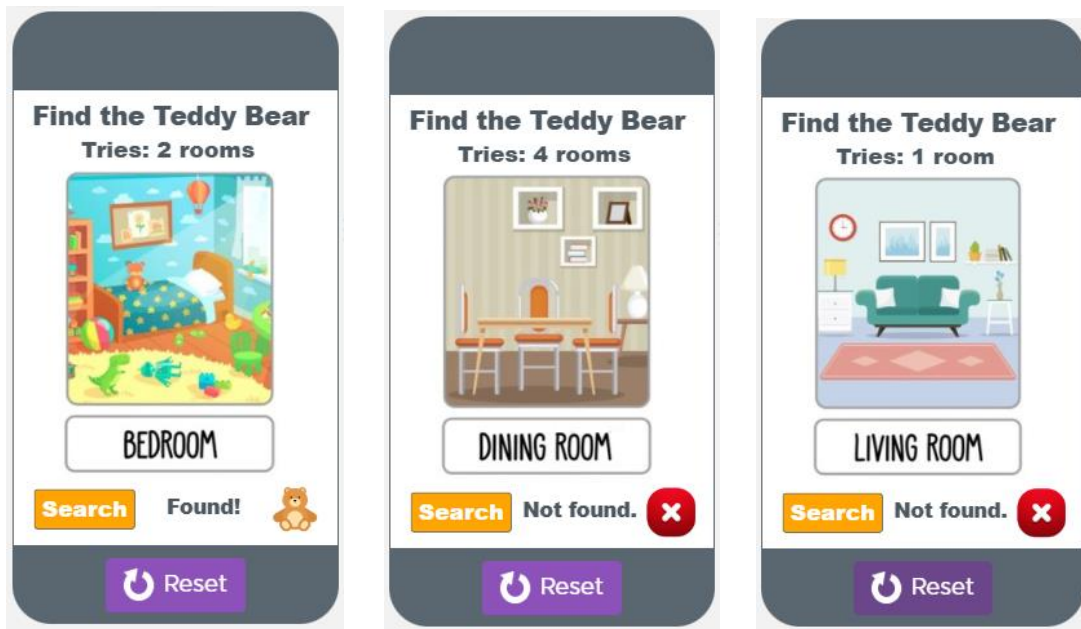

```
function livingPick() {
  var next = prompt("Go to (D)ining or (B)edroom?");
  if (next=="D") {
    dining();
  } else {
    bed();
  }
}
```

You also need to finish the functions that change the screen to match the choice.

- attic
- bath
- laundry

This is an example for the living room.

```
function living() {
  room = "living";
  setImageURL(▼"roomPic", ▼"living.png");
  setText(▼"found", "Not found.");
  setImageURL(▼"right", ▼"No.png");
}
```

Cut and paste in this code to get you started.

```

var room = "living";
var count = 1;
onEvent("search", "click", function() {
  if (room == "living") {
    livingPick();
  } else if (room == "attic") {
    atticPick();
  } else if (room == "bath") {
    bathPick();
  } else if (room == "bed") {
    bedPick();
  } else if ((room == "laundry")) {
    laundryPick();
  } else {
    diningPick();
  }
  count=count+1;
  setText("tries", "Tries: "+count+" rooms");
});

//To choose next room -----
function livingPick(){
  var next = prompt("Go to (D)ining or (B)edroom?");
  if (next=="D") {
    dining();
  } else {
    bed();
  }
}
function bedPick(){
  var next = prompt("Go to (A)ttic or (L)iving?");
  if (next=="A") {
    attic();
  } else {
    living();
  }
}
function atticPick(){

}
function bathPick(){

}
function laundryPick(){

```

```
}
function diningPick(){

}

//To change screen to match choice -----
function living(){
    room = "living";
    setImageURL("roomPic", "living.png");
    setText("found", "Not found.");
    setImageURL("right", "No.png");
}
function bed(){
    room = "bed";
    setImageURL("roomPic", "bed.png");
    setText("found", "Found!");
    setImageURL("right", "Teddy.png");
}
function dining(){
    room = "dining";
    setImageURL("roomPic", "dining.png");
    setText("found", "Not found.");
    setImageURL("right", "No.png");
}
function attic(){

}
function bath(){

}
function laundry(){

}
}
```
