

Indenting Code

3.10 

How to indent code:

- Indent in (to right) with {
- Indent out (to left) with }
- Move to a new line (press enter) with {, }, ;

```
function draw() {  
  drawSprites();  
  
  if (frame1.x < -200) {  
    frame1.x = 600;  
  }  
  if (frame2.x < -200) {  
    frame2.x = 600;  
  }  
}
```

Review of Comment types:

<i>Title</i>	// Author: Ida Knowe // Due Date: May 17, 2019 // Purpose: The Bunny Walker
<i>Explain Sprites</i>	// Main character - the bunny
<i>SubTitle</i>	// Collisions - "eat" and get points

Organization is key! Use comments to group your code and give it subtitles.
