

Question and Answer

Write a program that asks a series of questions and prints the user's answer on the screen.

Ask for their:

1. First name
2. Last name
3. Age
4. Postal Code
5. Year they were born
6. School attending

Then, ask:

7. Do you like computer coding?
8. What is 3+4?
9. What is the price of pizza in the cafeteria?
10. What do you have first period?
11. Who is your hero?
12. What did you do this summer?

Starter Code

Remember that you need **IO** from the main webpage.

Ready to Program IO file: <https://www.youtube.com/watch?v=NErPfwT8&feature=youtu.be>

Eclipse IO file: <https://www.youtube.com/watch?v=7mkixJg5Ilc&feature=youtu.be>

```
public class QuestionAnswer
{
    public static void main (String args[])
    {
        new QuestionAnswer ();
    }

    public QuestionAnswer ()
    {
        String num = IO.inputString ("What is your favourite number? ");
        System.out.println ("You answered: " + num);
        System.out.println ("");

        String breakfast = IO.inputString ("What did you eat for breakfast? ");
        System.out.println ("You answered: " + breakfast);
        System.out.println ("");
    }
}
```

Starter Program (Chromebook - Repl.it):

<https://repl.it/languages/java10>

Repl.it Input Demo: https://www.youtube.com/watch?v=o4d1N_Iw1E8&feature=youtu.be

```
import java.util.Scanner;
class Main {
    public static void main(String args[]) {
        Scanner input = new Scanner(System.in);

        System.out.print ("What is your favourite number? ");
        String num = input.nextLine();
        System.out.println ("You answered: " + num);
        System.out.println ("");

        System.out.print ("What did you eat for breakfast? ");
        String breakfast = input.nextLine();
        System.out.println ("You answered: " + breakfast);
        System.out.println ("");

    }
}
```
