

Favourites

The purpose of this program is to practice using output.

- Cutting and pasting is a GREAT idea. We do a lot of that when we program.
- Don't spend too long on it. No one's going to hold you to your answers.

Make a program where you answer the following questions using System.out.println.

1. What is your name?
2. What is your favourite colour?
3. What is your favourite TV show?
4. What is your favourite movie?
5. What is your favourite computer game?
6. What is your favourite food?
7. What is your favourite Disney character or movie?
8. Who is your favourite singer/group/musician?
9. What is your favourite sport?
10. What is your favourite sports team?
11. What is your favourite book?
12. What is your favourite subject?
13. What city would you like to visit?
14. Do you have any siblings? How many?
15. Why did you take computer programming?

You are my favorite proton

Here is a starter program for Ready to Program or Eclipse:

(Cut and paste it into Java. Save it to your unit 1 folder).

```
public class Favourites {
    public static void main (String args[]) {
        new Favourites ();
    }
    public Favourites ()
    {
        System.out.println ("My name is Ms. Gorski.");
        System.out.println ("");
    }
}
```

Starter Program (Chromebook - Repl.it):

<https://repl.it/languages/java10>

```
class Main {
    public static void main(String args[]) {
        System.out.println ("My name is Ms. Gorski.");
        System.out.println ("");
    }
}
```
