

Postal Rates

Canada Post has the following price scheme:

CANADA POST INTERNATIONAL LETTERS

1-9 letters	\$5 each
10-19 letters	\$3 each
20-39 letters	\$2 each
40+ letters	\$1 each

Make a program that calculates the cost of international letters.

This is an example. The user input is in blue.

```
Welcome to Canada Post International Letters!  
  
**From anywhere... to anyone**  
  
How many letters would you like? 23  
The cost per letter is $2  
The total cost is $46
```

If you are efficient, few lines are needed. I coded this in ten lines.
