

Square Making

You will need three nested loops for this program! Watch your brackets!!

Instructions:

Get a number from the user.

Make a square of that size on the screen:

Print a line of that many * on the screen using a loop.

Then, put a second loop around your first one to make a series of lines on the screen.

Then, make another loop another your other loops to handle the quitting condition

Output (input is shown in red):

```
---Welcome to the Square Making Program---
```

```
You want squares, we make squares!
```

```
What dimension of square? (-1 to quit) 4
```

```
****  
****  
****  
****
```

```
What dimension of square? (-1 to quit) 2
```

```
**  
**
```

```
What dimension of square? (-1 to quit) -1
```

```
Goodbye!
```

```
Hope you enjoyed making squares.
```
