

# How many rolls until you get doubles?

Translate this flowchart into code.

Some starter code:

```
public class rollDoubles {  
    public static void main(String args[]) {  
        new rollDoubles();  
    }  
    public rollDoubles() {  
        System.out.println("How many rolls until you get doubles?");  
        int dice1=(int)(Math.random()*6)+1;  
    }  
}
```
