

# Mixed Up Letters

Make this applet.

The colours can be anything you want, but the following is needed:

- All the buttons need to have their foreground AND background changed.
- The font of the title needs to be changed.
- The applet needs to be resized.
- The background of the applet needs to have a different colour.

```
import javax.swing.*;
import java.awt.*;
import java.awt.event.*;
import java.applet.Applet;

public class MixedUp extends Applet implements ActionListener
{
    public void init ()
    {

    }

    public void actionPerformed (ActionEvent e)
    {
    }
}
```
