

Repl.it Starter Code for Order Form

Look at the assignment on the main webpage.

Main.java

```
import java.awt.*;
import java.awt.event.*;
import javax.swing.*;
import javax.swing.border.*;

public class Main {

    public static void main(String[] args) {

        JFrame frame = new JFrame("OrderForm");
        frame.setSize(250, 250);
        frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);

        JComponent newContentPane = new Orderform();
        newContentPane.setOpaque(true);
        frame.setContentPane(newContentPane);

        frame.setLocationRelativeTo(null);
        frame.setVisible(true);
    }
}
```

Orderform.java

```
import java.awt.*;
import java.awt.event.*;
import javax.swing.*;
import javax.swing.border.*;

public class Orderform extends JPanel implements ActionListener {

    public Orderform() {
        JLabel title = new JLabel ("Welcome to the Order Form");
        add (title);
    }

    public void actionPerformed(ActionEvent e) {
    }

}
```
