

Connect4 Extra Coding Suggestions

Once you have basic Connect4 working, you might want to add some extra complexity by adding some other pieces to your harder levels. These are some suggestions.

Icon	Title	Description
	Blocker	This piece prevents you from going there.
	Ice	If you want to go on the column, you have to answer a random Math question to melt it. Once it is melted, it is gone.
	Firecracker	Every three turns, the firecracker clears a column.
	Booster	If you place a piece in its column, it disappears and you get an extra turn.
	Firefly	This one has to be hit three times before it will move. The first time you hit it, it opens, then it starts glowing, then it moves. Every time you hit it, your piece disappears.
