

# Pumpkin Sizes

There was a pumpkin growing contest with 12 pumpkins entered. Their sizes range between 200 and 650 kg.

1. Create an array with 12 pumpkins weights in it.
2. Print out the weights horizontally, with a title.
3. Print out the average, with a customized sentence.
4. Print out the maximum size. The sentence should say that was the winning weight in the contest.

Use code formulas in [http://www.gorskicompsci.ca/ICS4C/2\\_Arrays/intArrayFormula.java](http://www.gorskicompsci.ca/ICS4C/2_Arrays/intArrayFormula.java).
