See how many of the following you can complete:

1. Create an applet that has (1) a display with a zero, (2) a +5 button, (3) a +7 button (4) a square root button
2. Get the buttons to work.
`count = (int) (Math.sqrt(count));` might be a useful line of code.
3. Add a reset button. Make it work.
4. Check that you can't go over 60.
5. Check that 2, 10, 14 appeared in that order.
6. Make a log of the numbers that have appeared.
7. Check that you can have the same number isn't outputted twice.
