

Pizza App – Relative Layout

You already know how to use a linear layout:

```
<LinearLayout
    android:layout_width="match_parent"
    android:orientation="horizontal"
    android:layout_height="wrap_content">
</LinearLayout>
```

There are also relative layouts:

```
<RelativeLayout
    android:layout_width="match_parent"
    android:layout_height="match_parent">
</RelativeLayout>
```

More details about relative layouts can be found here: https://www.youtube.com/watch?v=CW7M_akbp64

Task:

- Provide the XML for the screen shown in the attached picture.
- It has both of layouts (linear and relative) shown above in its code in some manner.
