

XML code testing

If Android isn't working, or in the lab.

Starter code:

```
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical">
    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:padding="30dp"
        android:text="Hello World!"
        android:background="#FF0000"
        android:textSize="50sp" />
</LinearLayout>
```

Visualizer:

Code here: <https://jsonformatter.org/xml-viewer>

Check it here: <https://android-layout-visualizer.barmej.com/>

Layout gravity doesn't work there. Don't tell me about it. You have to use Studio to get full functionality.
