

## Haiku Error Messages

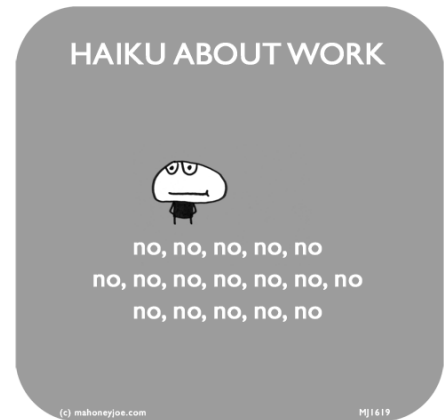

Years ago, before you were born, a coder posted this a message board (umm.... It's sort of like Facebook or Instagram):

IMAGINE IF INSTEAD OF CRYPTIC TEXT  
STRINGS, YOUR COMPUTER PRODUCED ERROR  
MESSAGES IN HAIKU...

Many people responded with things like:

A file that big?  
It might be very useful.  
But now it is gone.

Yesterday it worked  
Today it is not working  
Windows is like that

I have taken some of their messages and encrypted them using this code:

```
haiku = haiku.replace ('a', '3');  
haiku = haiku.replace ('e', '#');  
haiku = haiku.replace ('i', '$');  
haiku = haiku.replace ('t', '&');  
haiku = haiku.replace ('h', '@');  
haiku = haiku.replace ('s', '*');  
haiku = haiku.replace ('u', '6');  
haiku = haiku.replace ('o', '9');
```

You need to reverse the encryption on all of the Strings AND print them on the screen.

**Starter Code:** (class name = Haiku)

```
public class Haiku {  
  
    public static void main (String args[]) {  
  
        String hk1 = "@3v$ng b##n #r3*#d, | &@# d9c6m#n& y96'r# *##k$ng | m6*& n9w b# r#&yp#d.";
