## Circles R Us - Making Your Own Excel Formula

1. Start with your spreadsheet looking like this:

Side Note: We will be making this:

Repeat: Do NOT put in formulas.

Do NOT put in formulas.
2. Press Alt+F11 to Open the Visual Basic Editor. It looks like this:

3. Choose to insert a module:

4. Inside the Module, cut and paste in the following:

Function Pi()
$\mathrm{Pi}=3.141592654$
End Function
Function CircleArea(r As Integer)
CircleArea $=\mathrm{Pi}()^{*} \mathrm{r}^{\wedge} 2$
End Function

5. Go back to the spreadsheet to test it. Type in your new formula:

| B8 | : | $\times \vee f_{x}$ | =CircleArea(B3) |  |
| :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | D |
| 1 | Circles R Us |  |  |  |
| 2 |  |  |  |  |
| 3 | Radius: | 7 |  |  |
| 4 |  |  |  |  |
| 5 | 2 Dimensions |  |  |  |
| 6 | Diameter |  |  |  |
| 7 | Circumference |  |  |  |
| 8 | Area | =CircleArea(B3) |  |  |
| 9 |  |  |  |  |
| 10 | 3 Dimensions |  |  |  |
| 11 | Surface Area |  |  |  |
| 12 | Volume |  |  |  |
| 12 |  |  |  |  |

6. Go back to the Visual Basic Editor and make functions for the other 4 spaces.

| Geometric Figure | Perimeter | Area |
| :--- | :--- | :--- |
| Circle | $C=\pi d$ <br> or <br> $C=2 \pi r$ | $A=\pi r^{2}$ |

| Geometric Figure | Surface Area | Volume |
| :--- | :--- | :--- |
| Sphere | $A=4 \pi r^{2}$ | $V=\frac{4}{3} \pi r^{3} \quad$ or $\quad V=\frac{4 \pi r^{3}}{3}$ |

7. Add your new formulas to the spreadsheet.

| B1 | 2 | $\times \quad{ }^{\text {x }}$ | =SphereV(B3) |  |
| :---: | :---: | :---: | :---: | :---: |
| - | A | B | C | D |
| 1 | Circles R Us |  |  |  |
| 2 |  |  |  |  |
| 3 | Radius: | 7 |  |  |
| 4 |  |  |  |  |
| 5 | 2 Dimensions |  |  |  |
| 6 | Diameter | 14 |  |  |
| 7 | Circumference | 43.9823 |  |  |
| 8 | Area | 153.938 |  |  |
| 9 |  |  |  |  |
| 10 | 3 Dimensions |  |  |  |
| 11 | Surface Area | 615.7522 |  |  |
| 12 | Volume | 1436.755 |  |  |
| 13 |  |  |  |  |

8. When you save, you must use a "Excel Macro-Enabled Workbook" - which is not the default type. Make sure you select it.
