Conclusions Phase

The math is done. You've got some graphs. So what does it mean?

Make research question or graph into a sequence of slides.

Introduction slides

- ❑ Why is it important?
- ❑ What were you looking for?
- ❑ How was the research gathered?

Graph slides

- ❑ What did you find?
- ❑ What statistics did you find?
- ❑ What was surprizing? What wasn't?

Conclusion slides

- ❑ What is the answer to your research question?
- ❑ Overall, what do we know?
- ❑ Why is it important?

Notes:

- ❑ BIG pictures.
- ❑ Lot of pictures. Go add more pictures. Nope, still not enough.
- ❑ Make the pictures GIANT. G I A N T. Fill the entire page.
- ❑ Don't distort the pictures. Don't pixelate the pictures either. Get big ones.
- ❑ If it is too busy, add a square the size of your picture, and make it semi-transparent.
