

Traffic Lights

- The lights change rather quickly on this (2 seconds). That's to make it easier to see the cycle.
- You could easily change them to a slower time.

```
on start
  set haloDisplay to to Halo HD with 60 ZIP LEDs
```

This changes the light to red.

```
forever
  for index from 0 to 60
  do
    haloDisplay set ZIP LED index to red
    haloDisplay show
  pause (ms) 2000
```

Add sections for yellow and green. You will need to copy the code in box above and make some changes.
