

Clap Hands

Make the micro:bit's microphone respond to claps and beats with an animated light show.

How it works

- When the microphone detects a loud sound, like a clap, it shows a large heart on the LED display.
- If it detects a quiet sound, for example after your clap has finished, it shows a small heart.
- The effect of this is to create a simple heart animation that responds to claps or strong beats in music.

Code

Load this on a micro:bit when you are done and have it checked off.
